Majd Harb

Software Engineer

Beirut Governorate, Lebanon

Summary

Full-Stack Software Engineer experienced in building scalable web and mobile applications used by hundreds of thousands of users. I work across frontend, backend, and mobile systems and design system architectures and technical solutions for new features and integrations.

My work focuses on developing reliable APIs, integrating third-party services, and delivering production systems with automated CI/CD and mobile releases to the App Store and Google Play.

Core technologies: React, React Native, Next.js, Node.js, SpringBoot, Clojure, AWS, Docker, MySQL.

Experience

FinBursa

Software Developer

April 2025 - Present (1 year 4 months)

Contribute to the development and evolution of a SaaS platform, working across frontend, backend, and mobile systems. Design and implement features end-to-end, from requirements to production, using React, React Native, Spring Boot, and cloud-based infrastructure. Collaborate with cross-functional teams in an agile environment, helping define technical solutions and ensuring high-quality delivery. Conduct code reviews, mentor developers, and onboard new team members to maintain strong engineering standards. Work with technologies including SpringBoot, MongoDB, MySQL, React, React Native, AWS, Docker, and Jenkins, and contribute to integrating AI-driven features into the platform. Own the full development lifecycle of the mobile application, including architecture decisions, feature implementation, and production releases.

RAMS Services

Software Developer

April 2023 - Present (3 years 4 months)

Lead development of scalable web and mobile applications used by hundreds of thousands of users. Architect and implement backend services and APIs, ensuring reliability, performance, and maintainability. Own end-to-end delivery of features across frontend, backend, and mobile applications. Lead code reviews, mentor developers, and unblock team members across multiple projects. Onboard new engineers and contribute to improving development workflows and team productivity. Manage CI/CD pipelines and oversee production releases across the App Store and Google Play. Collaborate with product and stakeholders to translate requirements into technical solutions.

Selected Projects:

Tuhoon — Mental health platform where I owned the full system including backend, frontend, mobile app, and production releases

Cohort — Revamped the dashboard UI and implemented IoT door lock integrations for hotel access control, including permissions, access management, and checkout workflows

Finbursa — SaaS platform where I contributed full-stack, led parts of the team, conducted code reviews, and owned mobile application development

Jawfitness — Health and fitness application built with React Native (Expo), including activity tracking, Health Connect integration, and reward-based systems

Echo Valley Online Solutions

Mobile Application Developer

May 2022 - May 2023 (1 year 1 month)

Jdaidet El Matn

Developed and maintained full-stack web and mobile applications across multiple projects using React, Vue.js, Laravel, and Node.js. Built cross-platform mobile applications using Flutter and Ionic, handling both UI implementation and backend integrations. Designed and integrated REST APIs to support frontend features and ensure reliable data flow. Collaborated with product and design teams to deliver scalable and maintainable solutions, while improving performance, responsiveness, and overall user experience. Contributed to debugging, testing, and optimizing applications to ensure stability in production environments.

Al Rabiaa TV — Mobile application where I contributed to development and API integration

Gescom — SaaS platform and ERP system including stock management, employee management, and business operations, where I contributed to both frontend and backend development

M&M Taxi — Cross-platform Flutter mobile application where I contributed to feature development and backend integration

Education

Lebanese International University

Master of Science - MS, Computer and Communication

Engineering · (September 2019 - January 2022)

Lebanese International University

Bachelor of Applied Science - BASc, Communication

Engineering · (September 2016 - August 2019)
